DETAILED ACTION

Claim Objections

Claims 1-14 are objected to because of the following informalities: claim 1 line 9 reads " a" text which should be changed to "the" text. Furthermore line 17 reads "is has been accepted" should be corrected by deleting "is". Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Foti (US pat# 6,138,006) in view of Ogman et al. (US pat# 6,792,261) or Partridge (US Pat# 5,473,671) or He (US Pat# 5,937,043).

Regarding claim 15, Foti teaches a collect call system wherein a receiver and transmitter unit within a network can receive a collect call inquiry and notify a user of the collect call in (see disclosure) but fails to teach a call screening system for collect calls.

Ogman teaches a mobile collect call system and method comprising of call screening incoming calls including collect calls based on a check list or control inquiry in (see col. 8 line 61-col.9 line 20).

Partridge teaches a selective screening of incoming calls for telephone system wherein incoming calls to a called party can be allowed or blocked based on a check list in (see fig. 1).

Art Unit: 2643

He teaches a mechanism for a system and method for detecting fraudulent use of collect calls in (see abstract, fig. 2 and disclosure) wherein an incoming call information including calling line number and called party line number can be used in screening collect calls in (see cols. 3-4).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate either one of the secondary reference into that of Foti thus making it possible to screen incoming calls including that of collect calls to avoid fraudulent calls and loss of revenue.

Regarding claim 16, see the explanation as set forth regarding claim 15.

Allowable Subject Matter

Claims 1-14 and 17 are allowed.
